

High Energy Picosecond Erbium Fiber Laser Unit

LAS-EFL-PS-HE-U

Features

- * Pulse energy up to 3μJ
- * All-fiber design, industrial reliability
- * Maintenance free
- * Polarization-maintaining
- * Front panel LCD display and status LED indicators for quick access of unit's status
- * RS-232 interface for local supervision

Applications

- * Material processing
- * Semiconductor inspection
- * Harmonic generation
- * OPO pumping
- * Pump-probe

Description

GIP Technology High Energy Picosecond Erbium Fiber Laser Unit (LAS-EFL-PS-HE-U) is the 1μm band picosecond fiber laser source, delivering high peak power in standalone size for material processing, semiconductor inspection, and supercontinuum generation applications.

Our integral all-fiber design and splicing technology enable compact lasers. Compared with the

traditional rod or disc DPSS laser. The peak intensity of a laser pulse with a duration of only a few picoseconds is so high that nonlinear/multi-photon absorption occurs, resulting in a very precise "cold" process with little thermal effect

In addition, these units also provide a user-friendly status monitoring via an LCD display, LED indicators, and various communication interfaces (RS232).

High Energy Picosecond Erbium Fiber Laser Unit

LAS-EFL-PS-HE-U

Specifications

Optical Information		Unit	Description			
Saturated output power	Max.	Watt	0.5	2		
Mode of operation		Pulsed				
Center wavelength ^{*1}		nm	1550±5			
Pulse repetition rate ^{*2}		kHz	100 ~ 2000			
Pulse duration ^{*3}	Max.	ps	200			
Pulse energy	Max.	μJ	1	3		
Beam quality	Max.	M ²	1.3	1.4		
Polarization			Linear			
Polarization extinction ratio	Min.	dB	20			
Termination	FC/APC or Free space collimated beam					
Electrical Information						
Operating voltage		Volt	100 ~ 240VAC, 50/60Hz			
Control mode			ACC or APC			
Control interface			RS-232			
Pulse timing			External trigger, TTL			
Environmental Information						
Operating ambient temperature		°C	15 ~ 35			
Storage temperature		°C	0 ~ 60			
Relative humidity (non-condense)		%	5 ~ 85 (operating)			
Cooling			Air cooling			
Mechanical Information						
Control Unit Dimensions (W x L x H)		mm	19" 3U			

*1. Other wavelength on request

*2. Lower and higher repetition rate operation on request.

*3. Other pulse duration on request.
